Project Description:

Please set out what your project aims and objectives are as clearly as possible – you may continue on a separate sheet if necessary

Replace the heating system of 2 domestic boilers, 28 radiators + the water tank.

One of the existing boilers has been turned off because it is leaking, the water tank is also ~~leaking~~ leaking. A couple of radiators have small leaks and others are showing extensive rusting.

The system was installed when the hall was built in 2000 and desperately needs upgrading
