

Lightning-fast, full fibre broadband now available in Comberbach!

Come and find out more at our
community drop in session:

TUESDAY 28 NOVEMBER, 3-7pm
COMBERBACH METHODIST CHURCH

Full-fibre is the future.

Full-fibre will soon replace the existing copper network in a nationwide switch off, and both internet and phonelines will use full-fibre networks like ours. Full-fibre is the UK's fastest and most reliable broadband technology, delivering speeds of up to 1000Mb/s and unleashing untold potential for households and businesses.

Freedom Fibre has built a lightning-fast, full-fibre network in Comberbach, with much of it underground following feedback from local residents. The network build is almost complete and we are ready to connect our very first customers!

We're ready to connect you.

Come along to our community drop in session on Tuesday 28 November from 3pm at Comberbach Methodist Church. You'll be able to find out more about our service, discuss the BDUK Gigabit Voucher scheme and speak to two Internet Service Providers: TalkTalk and FACTCO.
